

## PROJECT LIFESAVER

The Reliable Rescue Program  
For Wandering Victims  
Of Alzheimer's and Related  
Mental Disorders

Sheriff's Project Lifesaver Team is specially trained, not only in search and rescue and the use of the electronic tracking equipment, but also in the methods necessary to communicate with a person who has Alzheimer's Disease or related disorders. Locating the individual is only part of the mission. The person who is located will be disoriented, anxious and untrusting. The Sheriff's Project Lifesaver Team knows how to approach the person, gain their trust and put them at ease for the trip home.

Project Lifesaver.....

Protecting the wandering and bringing peace of mind to families, caregivers and communities.

Sheriff's Officers place the first, Gloucester County Project Lifesaver bracelet on Harry Wohlfarth of Glassboro.

# Project Lifesaver

**OFFICE OF THE SHERIFF**

The reliable rapid-response partnership with law enforcement aiding victims and families suffering from Alzheimer's disease and related disorders such as Down's Syndrome and Autism.

## Gloucester County Launches Project Lifesaver *New Technology Assists in Locating Missing Persons*

### How Project Lifesaver works

The Gloucester County Office of the Sheriff is offering the caregivers of those with Alzheimer's Disease, and related dementia disorders which cause confusion and memory impairment, peace of mind with the launching of "Project Lifesaver."

Individuals suffering from Alzheimer's Disease and related dementia disorders are at risk of becoming lost due to memory and cognitive changes that occur as part of the disease. Participants in the Project Lifesaver Program wear a one-ounce battery operated radio wrist transmitter that emits a tracking signal every second, 24 hours a day. The signal can be tracked on the ground for one mile or in the air for five miles. The Project Lifesaver bracelet is also offered to qualified Autistic children.

"Caregivers and parents can now have peace of mind," said Sheriff Carmel Morina. "With Project Lifesaver most of the people are found within a mile of their home."

Each wristband emits a unique pulse-carrier wave radio frequency tracking signal. When a participant is reported missing, a specially trained search-and-rescue team from the Office of the Sheriff responds to the wanderer's area where this system has been used, search times have been reduced from hours and days to minutes, which can mean the difference between life and death.

It is a well known fact about 60 percent of people with Alzheimer's wander at some point during their illness. This technology helps families deal with the never ending fear the person may wander and be unable to find their way home.

The Project will more than pay for itself in the reduction of hours and resources required to conduct a search and rescue, not to mention the peace of mind provided to the families of the participants.

The Gloucester County Freeholder Board budgeted for Project Lifesaver and the county funds the cost of the bracelet to qualified applicants.

Anyone who has a friend or relative with Alzheimer's Disease, or Down's Syndrome (where a patient might be prone to wander away) who is interested in the Project Lifesaver Program can contact the Office of the Sheriff at 856-384-4620. Bracelets are available to indigent clients who qualify.
